 Client: **Bill Esposito**

WING CLIP INFORMATION

Feathers clipped are checked below:

	Right Side	Left Side
P10	<input type="checkbox"/>	<input type="checkbox"/>
P9	<input type="checkbox"/>	<input type="checkbox"/>
P8	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
P7	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
P6	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
P5	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
P4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
P3	<input type="checkbox"/>	<input type="checkbox"/>
P2	<input type="checkbox"/>	<input type="checkbox"/>
P1	<input type="checkbox"/>	<input type="checkbox"/>

	Right Side	Left Side
S10	<input type="checkbox"/>	<input type="checkbox"/>
S9	<input type="checkbox"/>	<input type="checkbox"/>
S8	<input type="checkbox"/>	<input type="checkbox"/>
S7	<input type="checkbox"/>	<input type="checkbox"/>
S6	<input type="checkbox"/>	<input type="checkbox"/>
S5	<input type="checkbox"/>	<input type="checkbox"/>
S4	<input type="checkbox"/>	<input type="checkbox"/>
S3	<input type="checkbox"/>	<input type="checkbox"/>
S2	<input type="checkbox"/>	<input type="checkbox"/>
S1	<input type="checkbox"/>	<input type="checkbox"/>

Every bird is an individual and based on their environment and ability, may require a different wing clip. Typically small birds require more wings clipped.

The goal is to prevent the upward flight of a bird and allow easy recapture. We do not want such a drastic clip that the bird nose dives to the ground.

The doctors and staff will do their best to achieve this balance. Please let us know for future reference is a wing clip is too slight or too drastic.
